

## Outcomes Data – Mapping the Contribution of Logan Together

The community-led, place-based work between Logan Together and the communities within Logan has already resulted in significant outcomes for children, families, communities and service providers in Logan. Some of these outcomes are reflected in our Data Postcard Series. Below are some of the highlights and statistics that have been demonstrated from the implementation of core suite initiatives and the ongoing relational, strategic and capacity building work within communities. While Logan Together plays a contributing role in achieving these outcomes, we acknowledge the contribution of all stakeholders in Logan, and the contribution that other external factors have also played, and continue to play in this social change.

The outcomes below have been affected by the Logan Together approach which joins the dots to create impact, using our 6 principles of Collective Impact:

- Container for Change
- Two-Way Learning
- Community Mobilisation
- Strategic Learning
- High Leverage Actions
- Sustainability

Together, these aspects have affected the establishment, the shape, the growth, the mind-frames and the alignment of effort to impact social change.
